

Job description TC:

Who is Serity and what do we stand for?

We are a dedicated team with unmatched team spirit. We know that the greatest things always come out of a great team. Everyone contributes a unique part to the big picture. This is what makes Serity special.

Multiculturalism and multi-diversity are core values of our company. We are looking forward to getting to know you.

Your Responsibilities as a **Technical Consultant** at Serity...

- Scripting experience (JavaScript, Jelly, HTML).
- Implementation and administration of customer requirements on ServiceNow.
- Debugging and optimization of complex infrastructures.
- Supporting the consulting of ServiceNow customers in the specification of solutions and the development of a requirements specification.
- Preparation of presentations of concepts, solutions as well as project status reports.
- Translation of business requirements into technical requirements and solutions.
- Configuration/development of ServiceNow according to defined customer requirements.

Looking forward to meeting you
